

Pre-Connectorized Assemblies

FiberExpress Patch Cords

AX200057 Patch Cord Multimode SC Duplex (568SC)

FiberExpress Patch Cords

FiberExpress duplex patch cord assemblies are of the highest quality available. They are assembled and 100% optically tested in our factory prior to shipment. All patch cords are built with high-quality connectors and cables which guarantees superior performance and excellent reliability.

FiberExpress Pre-Connectorized Assemblies

Cable Assemblies

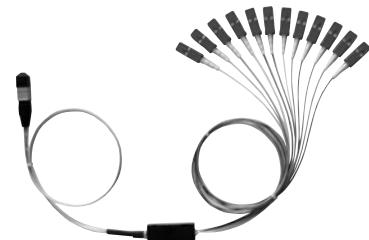

AX250105 MPO Cable Assembly

Multi-fiber Cable Assembly

900 µm Fan-out Assembly

These products are in the process of being assessed for RoHS compliance. Please check our website for the most current RoHS status.

MPO Cable Assembly

MPO cable assemblies are multi-fiber cables using single MPO connectors 6, 8 and 12-fiber that are used to interconnect pre-terminated devices such as FiberExpress pre-terminated modules and FiberExpress bars. Depending on the application, MPO cable assemblies can use ribbon cables or loose tube cables. MPO cables are available in lengths of up to 500 meters with a pulling-eye for ease of deployment.

Multi-Fiber Cable Assembly

Multi-fiber cable assemblies are factory-terminated fiber cables of various constructions (distribution, breakout or ribbon) using simplex, duplex or multi-fiber connectors. They are available in configurations from 2-fiber up to 144-fiber with various kinds of fan-out constructions, lengths and geometry to suit virtually any application.

FiberExpress Pre-Connectorized Assemblies

FiberExpress Bar

AX250001 FiberExpress Bar 12ST

FiberExpress Bar

The FiberExpress bar consists of a custom length fiber cable with, at one end, a factory pre-terminated rugged mini patch panel and, at the other end, a factory installed multi-fiber MPO connector. The very compact fiber patch panel contains 6 or 12 factory-terminated and tested connectors in a variety of styles. The ruggedness of the FiberExpress bar makes it an ideal candidate for disaster recovery, industrial applications and other fiber deployment in harsh environment.

FiberExpress Bar Accessories

The MPO adapter is the sleeve that provides primary alignment and locking when connecting the two MPO connectors (male to female). It has a flange and a metal clip for panel mounting and it is included with each FiberExpress bar (1m with male connector).

MX100154 FiberExpress MPO Adapter

The 19" (0.48 m) rack mount housing is a 1U metal panel that holds one FiberExpress bar. It has a live hinge on the left-hand side and swings out giving access to the MPO connection and facilitate cable management and slack storage when used with the slack storage tray.

The front cover is a smoked plexiglas cover that protects the fiber cords connected to the FiberExpress bar. It has 2 push rivets for positive locking and easy handling.

The slack storage tray attaches to the back of the 19" (0.48 m) rack mount housing to facilitate cable management and slack storage. It has a storage capacity of 5 meters of 12-fiber ribbon cable. The wall mount enclosure can contain one FiberExpress bar. It is made of heavy gage steel and has a locking cover.

FiberExpress Secure / Keyed LC System

Optimax® Field Installable Connectors and Patch Cords & Pigtails

AX102197 Secure/keyed LC Optimax®

Secure/keyed LC System

**FiberExpress Secure / Keyed LC System**

The FiberExpress secure/keyed LC system allows for physical segregation of network segments in secure fiber cabling infrastructures. All secure/keyed LC products are available with 6 different keying options each carrying a different color to facilitate network administration. The keying detail inside the connector is totally tamper-resistant and cannot be re-produced inside a standard LC connector to violate the network security. All products comply with the FOCIS 10 standard and optical performance exceeds all industry standards for SFF connectors.

The secure/keyed LC Optimax® field installable connectors are available in multimode 50 µm laser-optimized and 62.5 µm fiber versions. They are high-quality connectors that use a ceramic ferrule with a physical contact (PC) polish for multimode connectors.

The secure/keyed LC patch cords and pigtails are offered in multimode 62.5 µm (FX300), 50/125 µm (FX600) and laser-optimized 50/125 µm (FX2000) for the most demanding network performance.
